Introduction

With this pack we aim to give you small example of the range of the food we can provide and the events we can cater for. Because we are a local family restaurant we normally like to tailor the food we provide to the individual needs of the customer so please feel free to come and talk to us

Due to our long experience in event management we can also advise on what works best taking into account the function, numbers involved and the facilities available. Though we aim to offer good value for money we will only work to budgets that enable us to maintain the standard and reputation of The Bridge Restaurant.

We live and work within the local community and we always try and use as many local goods and suppliers as possible.
